

Enriched Air (Nitrox) Diver

Scuba Diving with Enriched Air Nitrox

The PADI Enriched Air Diver course is PADI's most popular specialty scuba diving course, and it's easy to see why. Scuba diving with enriched air nitrox gives you more no decompression dive time. This means more time underwater, especially on repetitive scuba dives.

The Fun Part

You can typically stay down longer and get back the water sooner. No wonder many divers choose this as their very first specialty.

Get College Credit

You may be able to [earn college credit for the PADI Enriched Air Diver course](#).

What You Learn

- Techniques for getting more dive time by using enriched air nitrox
- Enriched air scuba diving equipment considerations
- Enriched air considerations, including managing oxygen exposure, how to tell what's in your [scuba tank](#) and how to set your [dive computer](#)

The Scuba Gear You Use

You use all the [basic scuba gear](#). Your [dive regulator](#) must be enriched air compatible.

Check with us about gear rentals and packages offered with this course. You can find most everything here at NOVA Dive Center.

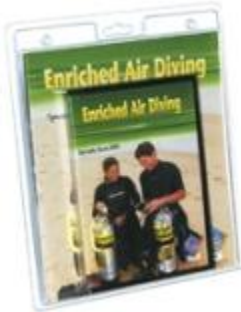

Prerequisites

To enroll in the PADI Enriched Air Diver course, you must

- Be 15 years or older
- Have a PADI [Open Water Diver](#) certification (or have a qualifying certification from another organization)

Ask your PADI Instructor about how you can start your PADI Enriched Air Diver course during your PADI Open Water Diver course.

The Learning Materials You Need

The Enriched Air Diver crewpak includes all required materials* to complete PADI's Enriched Air Diver specialty. The Enriched Air Diver Manual covers the procedures for diving with Enriched Air (up to 40%) and the Enriched Air Diving video on DVD demonstrates step-by-step how to plan a dive using multiple dive tables. The crewpak also includes the 32%, 36% and the DSAT Oxygen Exposure tables.

* The RDP™ used in the PADI Open Water Diver course is required but not included with this crewpak.

Your Next Adventure

Diving with enriched air nitrox benefits all types of diving, but it goes especially well with these specialties:

- PADI [Wreck Diver](#) course – Popular wrecks tend to be deeper, so enriched air nitrox maximizes your exploration time.
- PADI [Deep Diver](#) course – The deeper you dive, the shorter your no stop time – but enriched air nitrox increases it, giving you more time at depth
- PADI [Digital Underwater Photographer](#) – Photographers usually like to make several dives so they can get lots of pictures. Enriched air nitrox reduces the amount of residual nitrogen you accumulate, allowing repetitive dives to be longer.
- PADI [Master Scuba Diver](#) The PADI Enriched Air Diver course counts toward your Master Scuba Diver rating -- the highest non professional rating in recreational diving.
