

Tec Deep Diver

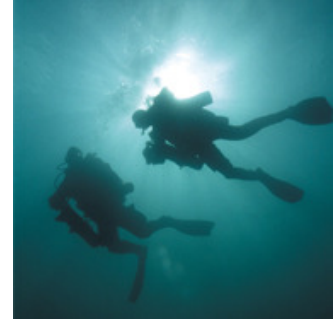

DSAT Tec Deep Diver Course

The DSAT Tec Deep Diver course completes your training as an entry-level tec diver, taking you past the limits of recreational diving.

What You Learn

During the Tec Deep Diver course, you

- Make four actual decompression dives as deep as 50 metres/165 feet
- Use enriched air nitrox and/or oxygen for decompression
- Use desk top decompression software to create custom dive tables and plan your dives
- Qualify to make technical decompression dives independently

The Learning Materials You Need

The Tec Deep Diver Crew-Pak, which introduces you to tec diving lingo, emergency procedures, decompression and stage cylinder handling and gas planning. The pak includes a manual, dive planning checklist and dive planning slate. The optional Equipment Set-up and Key Skills video on DVD is a great tool to help you practice at home in between your tec diving adventures.

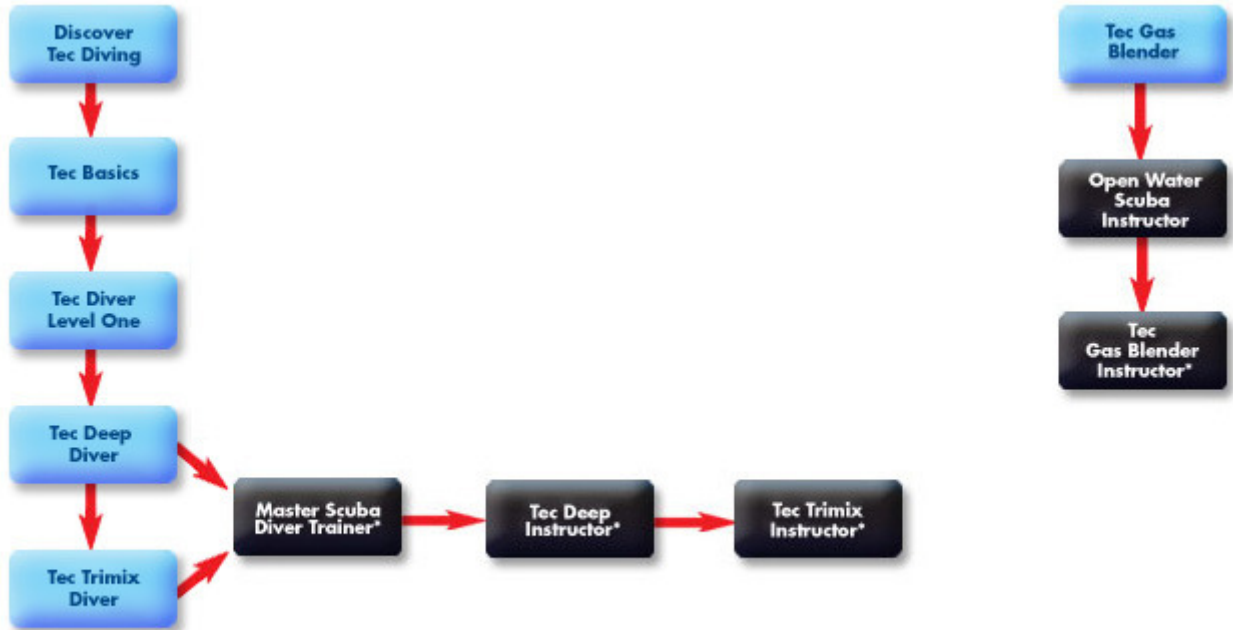

To purchase this product, contact your local PADI Instructor, [dive shop or resort](#).
